Straddle Carrier Training and Certification

HSCS deliver HSE fully accredited and approved training courses for Straddle Carrier operator training and certification via the ITSSAR HSE accredited Training. Operator courses includes Novice, Experienced, Refresher, conversion, Attachment (specific to the attachment being used) etc

All operator training courses are designed to train the basic skill requirements and associated job safety knowledge of basic Straddle Carrier operation, This is to the accredited levels of skill, ability & safety as in section 2 of the Health & Safety at Work Act 1974, PUWER, LOLER, etc

Typical Course Content

Responsibility of the operator	Simple & Advanced Manoeuvring
Operational Safety Code	Risk Assessment
Basic Hydraulic systems	Stacking & Destacking (Free & Bulk)
Refuelling	Vehicle Loading / Unloading
Daily Safety Checks	Practical Examinations
Site Safety	Knowledge Examination

Course Availability	On Site
Examinations	Knowledge & Skills
Certification	HSE Accreditation
Durations	Variable

Straddle Carrier Course Durations Guide

These are based on standard basic equipment ie 25-45 tonne Straddle Carrier- The type of SC, operating conditions and load types will vary durations to discuss your specific requirements, please contact us on 01536 414966

Course Type	No Of Delegates	Duration OHC
Refresher. <i>Has held recognised Certification within the last 5 years and has used SC's at least once per week, (or has lost certification)</i>	1	½ Day
	2	1 Day
	3	1 Day
	4	N/A
Experienced Operator <i>(Does Not Hold Certification but has been using SC's at least twice per week for previous 3 months, or a new member of staff with only in house certification, or who has not used SC since last certificated)</i>	1	1 Day
	2	1 Day
	3	2 Days
	4	N/A
Novice Operators <i>(Have never undergone training and has no experience in operating SC's)</i>	1	3 Days
	2	4 Days
	3	5 Days
	4	N/A
Conversion Courses <i>Have been trained and certificated on similar equipment (Other Carrier Types - Lift trucks etc)</i>	1	1 Day
	2	2 Day
	3	2 Day
	4	N/A

Please Note – where multiple delegates are indicated it is assumed that they can all attend together

EXAMINATION STANDARDS

These standards have been developed over a number of years to meet and exceed the training requirements as laid down by HSE regulatory requirements, and have been adopted by HSCS as a means of ensuring national, uniform standards for the examination of a Straddle Carrier operators skills and safety knowledge. Continuous assessment of an operators' progression will naturally be undertaken during training by instructors.

The test will only be administered by approved HSCS trainers, instructor/examiner and in accordance with the Health & Safety Commission/Executive Approved guidance MHASAWA, PUWER, LOLER etc.

Candidates must attain pass levels in all three examinations (Practical, Knowledge & Pre Operational Checks) to receive Certification.

CERTIFICATION

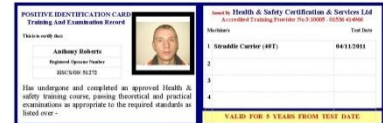

Certification will be issued to candidates who can demonstrate the required levels of skill, safety and knowledge. The certification issued is that referred to in the HSE regulations.

Operators Certificate, (A4) this gives the required details of the operators training dates, the venue, the equipment type, the SC group, any specialist applications, the client company, the operators registered number, the registered trainer / instructor / examiner name and registered number, the training provider (HSCS) their address and contact details.

As can be seen this is a positive identification document that carries the registered operators photograph. This certificate is also signed by the training providers authorised signatory and then laminated to avoid tampering and / or fraudulent use. Certification(and ID) is issued for 5 years (HSE Recommend refresher training at 3 to 5 year periods)

Positive ID Card, this is issued in addition to the certificate. Where certification will be held in the personnel department, or training record files, the ID card is credit card sized and is designed for the operator to carry at all times. The card details the machines the candidate has been certificated on, and again carries relevant details of training etc.

What's Included

Training and certification courses are carried out at your designated mainland UK site/s and include all examination fees, operator registrations, course handouts, operator and course reports, training records, certification, ID cards and all travel and expenses. **Why pay a mileage fee just because your location does not coincide with your training providers?** As long as the course is held on the UK mainland, all travel and expenses are included in course fees, any expenses incurred for non-mainland training are charged at cost.

What Facilities Do We Require

A suitable room/office/area to administer course documentation, knowledge sessions and safety test with a 13amp 3 pin 230v power supply, the Straddle Carrier, representative loads, slinging equipment (as appropriate) all in a safe condition and compliant to regulatory requirements. Finally a practical are for the training and practicing of operational techniques and practical examination. HSCS will supply all course documentation, training DVD's course manuals and even a portable DVD player or laptop/projector as appropriate.

We thank you for allowing us this opportunity of introducing ourselves to you, and would very much like to prove to you that we can offer a service that not only meets legislative requirements, but also offers a genuine way forward to cost effective quality training and services that contribute to the overall benefit of your company employees and clients.
